### To Whom It May Concern

I hereby write a reference for Mr. Huzaifa Mustafa for his MS studies at your prestigious institute. I know him in my capacity as Lecturer at Hamdard University. I have known Mr. Huzaifa as undergraduate student of the Department of Computer Science. Mr. Huzaifa is known to me for a couple of years as my undergraduate student in the following courses:

- Data Communication and Networks
- Numerical Computing

He has also done the final year project under my supervision titled “Real Time Emotion Detection using Convolutional Networks” in which he was a very inquisitive and engaged student, with a very positive attitude throughout the year. He stood out smart, motivated, and diligent student. Mr. Huzaifa was also a very active participant in all class discussions and activities; while he contributed insightfully and always took our discussions to another level, he was also very supportive and inclusive of others and always listened thoughtfully to the contributions of his peers. I have a strong belief that he is capable to work remarkably in Master’s degree because he has the ability to complete all the assigned tasks within stipulated time period. He can prove himself to be a valuable student of this institution.

Apart from academics, he has been involved in many inter-university’s extracurricular competitions. He has been an active member of different societies and sports club. Based on my professional experience, I have evaluated Mr. Huzaifa Mustafa as intelligent, dependable, and purposeful person. To sum up all, I highly recommend him for master’s studies in your university. I am confident he will make an excellent addition in researcher’s community. Please feel free to contact me if you have any questions regarding his character or past academic work.
